

# Manual Meat Wrapping Process

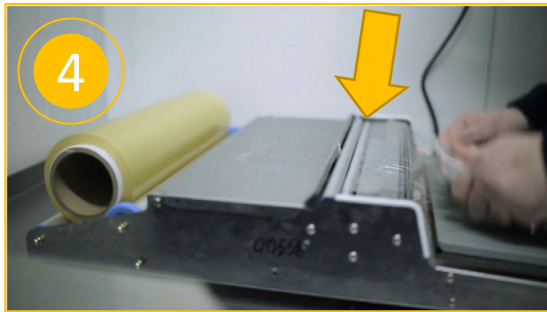

**1**  
Place the tray of meat on the wrapping platform.

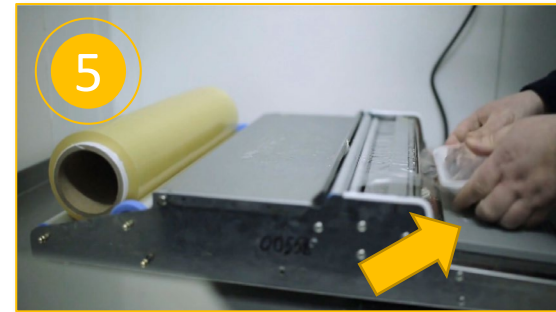

**2**  
Grab the clear PVC film and pull over the tray.  
(Pull out enough film to cover entire tray.)

**3**  
Pick up the tray and pull it toward you.

**4**  
As you pull the tray down, the hot bar located above the machine's hot plate will cut the film.

**5**  
Seal the plastic film on the hot plate and tuck the sides underneath.
